

FERREX

Get the best from the best!

Monitor in previous crop, post harvest & before drilling

Application timing is key, immediately after drilling & rolling

Monitor slug activity in emerging crops, look for plant damage not dead slugs

Re-apply baits if disappearing (7 day interval)

Use full dose 6 kg/ha to achieve maximum baiting points (60-66/m²)

Aim for consistent coverage not maximum spreading width

For more information please contact:

Sipcam UK 01763 212 100 (info@sipcamuk.co.uk)

Ferrex (MAPP 19138) is a slug lentil containing 2.5 % anhydrous ferric phosphate
